Peppermint Oil Hair Gel

#14228-1

This clear gel provides a hard locked in place type hold. The Biostyle XH supplies the fixative properties from a more naturally derived material than its PVP counterparts. Novethix L-10 builds the viscosity for the formula and can easily be scaled to meet your final viscosity targets.

Phase	INCI Name	Brand Name	Function	Percent
A	Water			79.05
	Acrylates/Beheneth-25 Methacrylate Copolymer	Novethix™ L-10	Polymer	7.00
B	Mentha Peperita (Peppermint) Oil	Peppermint Oil		2.00
	Polysorbate 20	Esorb L-20		8.00
C	Water (and) Sodium Hydroxide	NaOH 25% Solution	Neutralizer	0.85
	Maltodextrin/VP Copolymer	Biostyle™ XH	Polymer	3.00
	Methylchloroisothiazolinone and Methylisothiazolinone	Esept KCG	Preservative	0.10
				100.00%

Mixing Instructions

Combine the **Phase A** ingredients mixing thoroughly.

In a separate container, combine the **Phase B** ingredients, mixing thoroughly.

Add the **Phase B** mixture to the **Phase A** mixture.

Slowly neutralize with the Sodium Hydroxide.

Add the remaining ingredients, mixing thoroughly after each addition.

Appearance: Clear Gel

Final pH: 6.64

Viscosity: 680,000 cps 64/0.3 (LV)
