			100%

## Key Benefits

- BENTONE® LUXE WS - The cold processability and aesthetic feel of BENTONE® LUXE WS improves the economics of this formula while improving the feel. The unique lighter feel of BENTONE® LUXE WS water-in-emulsions creates unique opportunities for this category of lotions and creams.
- BENTONE GEL® IHD V helps improve the aesthetics by increasing the viscosity and being non-greasy. There is the additional benefit of the clay structure assisting in the stabilization the continuous phase.
