Body Lotion

#13091-2

Bentone Luxe WN creates this quick breaking, cold process W/O lotion that leaves the skin hydrated. The moisturization package consists of Genencare OSMS MI and Hydrovance. Several novel emollients such as Plantasens Olive LD, Fancor Abyssinian oil, and Floraesters 15 aid in the rich texture and luxurious feel of the formula and offer you a point of differentiation in the marketplace. The Amaze XT helps stabilize the emulsion by increasing the viscosity of the water phase without weighing down the formula.

INCI	TRADE NAME	FUNCTION	SUPPLIER	%
PHASE A				
Water				57.00
Propanediol	Zemea® Propanediol	Emollient	DuPont Tate & Lyle	3.00

TOTAL				100%

Mixing Instructions

- Combine the Phase A ingredients, adding one at a time and mixing until homogenous after each addition.
- In a separate vessel, combine the Sunflower Oil and Bentone Luxe, mixing until homogenous. Add remaining Phase B ingredients one at a time, mixing until homogenous after each addition.
- Add the Phase A mixture to the Phase B mixture. Mix at moderate speed until homogenous.
