

Overnight Glow Slugging Ointment

#13167-2

A natural alternative to petrolatum for your overnight, extreme moisturization, and slugging needs... plus CBD. Castorlatum™ is a green and vegan acceptable petrolatum alternative providing the base for the formula and is responsible for the occlusive barrier to lock in moisture. Bentone® Plus CBD provides easy access to the CBD trend and makes formulating straight forward with a master gel for easy incorporation and optimal distribution of the CBD to the applied area. A rich and marketable emollient package of Jojoba, Abyssinian, and Triolein helps give the formula glide and spread ability along with a host of skincare benefits. A botanical package of Actiphytes™ in oil soluble forms were added for label claim and can be easily modified to align with your brands identity.
