Mixing Instructions

- Combine the Phase A ingredients in the main and mix until uniform. Heat phase A to ~75°C.
- In a separate container, combine the Phase B ingredients and heat mixture until it reaches approximately 75°C.
- Add the Phase B mixture to the Phase A mixture. Mix until homogenous, then remove from heat source.
- Once mixture cools to approximately 40°C, add the Phase C ingredients. Continue to mix until it
- reaches room temperature.
