Makeup Remover

#14142-1

Formula Highlights: Oilkemia™ 5S provides viscosity and structure to this anhydrous system while maintaining clarity. At this use level you can create a texture capable of holding 3-D shapes if hot poured into molds. Floraesters® IPJ keeps the aesthetics light without being greasy and through its unique solubilization properties helps remove makeup. Crystal Crown® and Fancor® Meadowfoam seed oil fill out the rest of the formula to add intrigue to the ingredient listing and allow for marketing stories to be told about these on trend botanicals.

INCI	Trade Name	Function	Percent
Caprylic/Capric Triglyceride (and) Polyurethane-79	Oilkemia™ 5S	Polymer	12.00
