Activae DGR

Activae DGR is an optimized surfactant blend intended for use in water based alkaline and acid cleaners.

Specification

	Limits	Method
Cloud point in formulation	min.40°C	formulation test*
pH 1% in water	5-8	measurement with pH meter

*formulation test can be provided to you for evaluation upon demand.

Typical data

Active content	75%
Appearance at 20°C	Clear / slight opalescent liquid
Clear point	-7°C
Colour	<7 Gardner
Density, 20°C	1010 kg/m ³
Flash point	>100°C
Pour point	-10°C
Foam height according to Ross-Miles, 50°C	Immediate: 130 mm
0,05%	after 5 min: 110mm.

Solubility

Activae DGR is soluble in:

- Water
- 2-propanol
- Ethanol
- Propylene glycol.

Handling

Activae DGR should be homogenized before use in the following cases:

- Every time product from the drum is partially used
- When product is stored at low temperatures (less than 6°C)
- When product rests in stock for a long period of time.
