

Shine Enhance Hair Oil

#15285-1

A lightweight oil to leave hair shining, soft, and resilient. Schercemol™ CATC provides body and great slip while Meristant® 101L courtesy of its high refractive index brings the shine. This concept is complete with lightweight natural emollients like Floraesters® IPJ and Plantasens® Flash 80 to keep the formula from weighing down the hair. The result is a finished product that restores brittle, dry hair to its natural luster, while maintaining a very high level of naturality for the sustainability-conscious consumer.

INCI	TRADE NAME	FUNCTION	SUPPLIER	%
Cocoyl Adipic Acid/ Trimethylolpropane Copolymer	Schercemol™ CATC	Emollient	Lubrizol	47.50

TOTAL				100%

Mixing Instructions

- Add the Schercemols™ to an appropriate-sized vessel, mixing thoroughly.
- Add the remaining components, one at a time, mixing thoroughly after each addition.

Appearance: Translucent, Light-Yellow Liquid

Application Instructions

- Dispense a few drops onto fingertips and gently run fingers through hair.
- Use on damp hair before blow drying for heat protection or apply to dry hair for extra luster, conditioning and frizz control.
